SUMMARY

Computer Science undergraduate with a strong foundation in Core Java, OOP, DSA, Java Collections, Spring Boot, SQL, and React.js. Hands-on experience building full-stack applications with Java and database integration. Solved 1500+ programming problems on CodeChef, demonstrating strong problem-solving skills.

EDUCATION

Sasi Institute of Technology & Engineering
B.Tech, Computer Science and Engineering — CGPA: 8.8/10
Vasavi Vignan Junior College
Intermediate, MPC — 96.2%
SSC
92.5%

Tadepalligudem, Andhra Pradesh
2023 – 2027
Penugonda, Andhra Pradesh
2021 – 2023

2021

PROJECTS

PoultryMart – Direct Farmer-to-Consumer Marketplace — MERN Stack (MongoDB, Express.js, React.js, Node.js)

- **Live Demo:** <https://poultry-mart.vercel.app/>
- Developed a full-stack marketplace using React.js and MongoDB to connect poultry farmers directly with consumers.
- Implemented farmer and admin dashboards for product management, inventory updates, media uploads, and listing administration.
- Designed MongoDB schemas for managing product, farmer, and marketplace data.
- Integrated WhatsApp messaging and phone-call functionality for direct customer communication.

TaxGenie – Tax Management Platform — Java, Spring Boot, React.js, MongoDB

- Developed a full-stack tax management application for handling company financial information and tax calculations.
- Built a Spring Boot backend to process company income and expenditure data and generate tax calculation results.
- Developed React.js interfaces for entering financial information and displaying calculated tax results.
- Integrated MongoDB for storing company financial records and tax-related information.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Core Java: Object-Oriented Programming, Data Structures and Algorithms, Java Collections, Exception Handling, Multithreading, Java 8 Features

Backend: Spring Boot, JDBC

Frontend: React.js, HTML5, CSS3

Databases: MongoDB, SQL, Database Connectivity

Tools: Git, GitHub, VS Code

ACHIEVEMENTS

- Solved 1500+ programming problems on CodeChef, demonstrating strong problem-solving and algorithmic skills.
- Participated in the ISRO Bharatiya Antariksh Hackathon 2026.
- Participated in the Google Cloud Gen AI Exchange Hackathon 2025.
- Achieved a 100-Day Diamond Streak on CodeChef.

CERTIFICATIONS

- Oracle – Foundations of Artificial Intelligence
- Infosys – Git
- CodeChef – Learn Java
- IBM – SQL and Relational Databases 101
- HackerRank – Problem Solving
- CodeChef – Learn Python Programming
